One of the major barriers to energy code adoption across the country is the concern that new codes will add to the purchase price and potential buyers will not be able to afford the homes they want. In Missouri, upgrading homes to the 2009 International Energy Conservation Code will actually reduce out-of-pocket expenses for homeowners – paying off their initial investment in a matter of months.

For the average new home built in IECC climate zone 4*, BCAP estimates the costs of the new code will add no more than a total of $1,519 in construction costs—an increase of only 0.6%. When this amount is rolled into the average mortgage, real costs to homebuyers will mean a down payment increase of $303.72 and $6.56 extra on monthly mortgage bills.

These added mortgage costs will be offset, however, by monthly energy savings of $28.06, helping homebuyers pay off their initial investment in only fourteen months. After breaking even in month fourteen, the home will return buyers a profit of $22 per month—for a total return of $258 every year. This return on investment is graphed below and presented as a balance sheet at right.

This model assumes an average sale price of $267,451 for a 2,400 square foot home. The mortgage is conservatively set at 30 years, with 20% down and the current average nationwide interest rate of 5.05%. With a lower down payment—such as 10% down—consumers will break even on their investment even sooner.

* Missouri’s climate zone 4 covers the lower three-fourths of the state, and represents 93% of the state’s population.
TRUE COST OF THE
2009 INTERNATIONAL ENERGY CONSERVATION CODE

Homes are the biggest investment we make—and everyone deserves a home that meets national minimum energy efficiency standards. While it’s true that homeowners can always improve the efficiency of their homes, it is far more cost-effective to upgrade building components during construction, putting in better windows or swapping out one grade of insulation for a better one. Here’s what buyers get with the 2009 IECC:

- **Lighting:** $50
- **Duct Sealing and Testing:** $350
- **Window Upgrades**
  - **Climate Zone 4:** $735
- **Insulation Upgrades**
  - **Climate Zone 4:** $383

**Payback Period**
- 14 months

**3-year Profit**
- $476.75

**Annual Energy Reduction**
- 18%

**5-year Profit**
- $992.69
